PROGRAM FOR THE CEJH CONGRESS 2014.....

32

ABOUT THE CEJH

The CEJH is an international youth organisation for horticulturists and florists. The foundation of the CEJH was 1965 in Thun in Switzerland.

AIMS OF THE CEJH

- to represent the interests and affairs of young horticulturists and florists
 - to promote the education and supplementary education of horticultural and florists professions
 - to make an effort to promote the international exchange of probationers at European level
 - to promote the uniting of the nations in Europe
 - to promote the international exchanging of vocational experiences of young people
 - to support the organisation of study trips
- be in contact with the AIPH and other European youth organisations, like CEJA, CEA and other European Committee

CONTACT

Address: Gießener Straße 47,
D-35305 Grünberg, Germany
Phone: +49 6401 910150
Fax: +49 6401 910176
E-mail: cejh@junggaertner.de

We are an international youth organisation in the field of horticulture and floristry.

We want supplementary professional education, to get to know different European cultures and to make new friends.

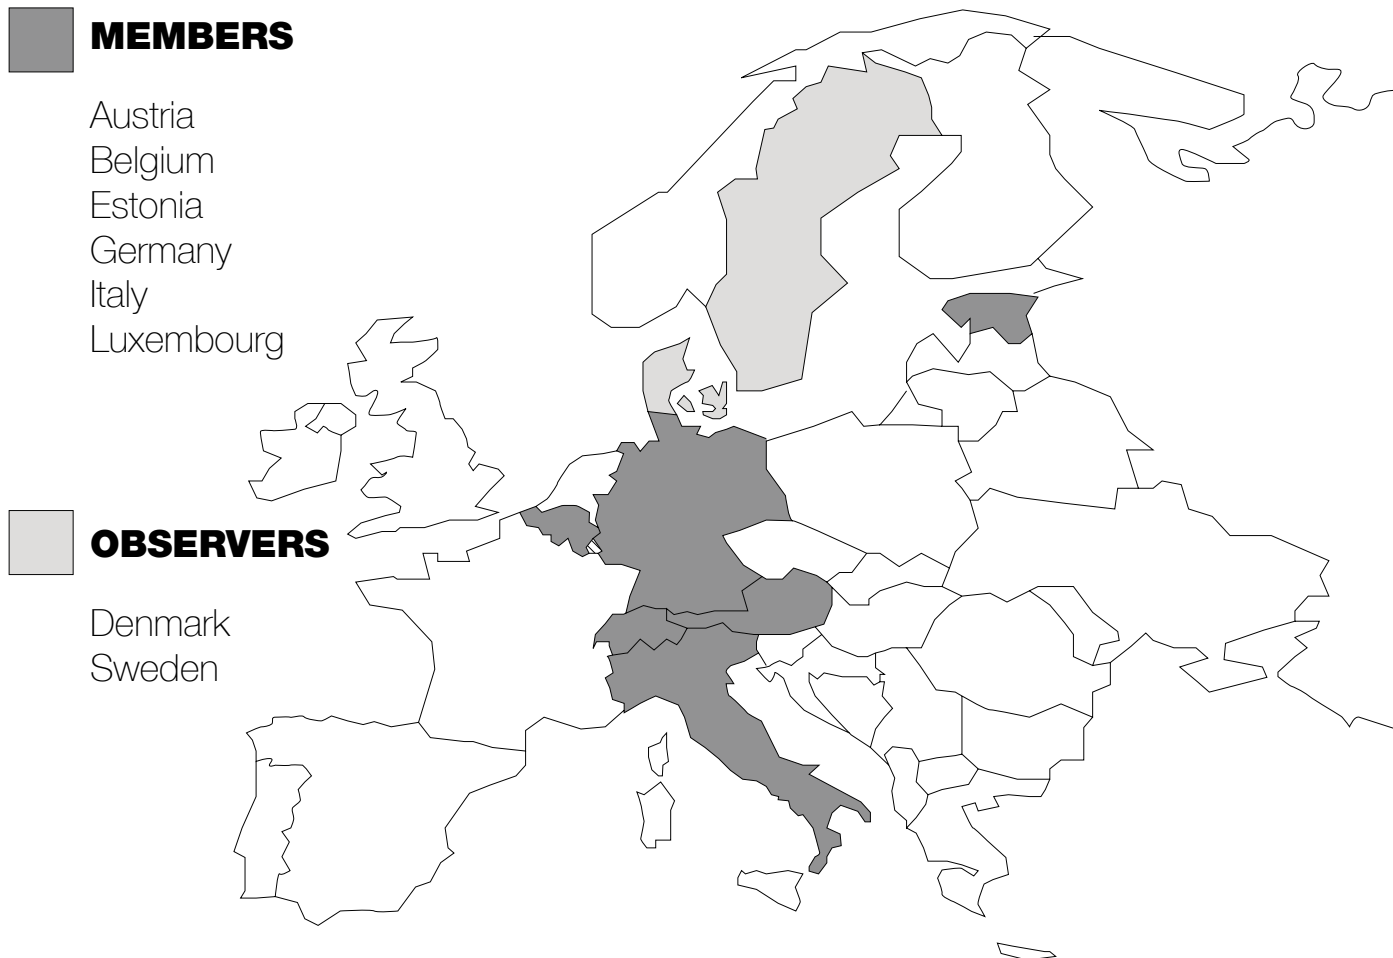

We offer technical congresses, seminar days, international contacts, meetings and international fairs and exhibitions.

landscaping

8:00 Breakfast

9:00 Wasserpielen Hellbrunn

12:00 Königssee Rundfahrt / Salzburg

20:00 Gala Evening

HELLBRUNN

Hellbrunn Palace is an early Baroque villa of in Salzburg, The schloss is also famous for its jeux d'eau ("watergames") in the grounds, which are a popular tourist attraction in the summer months. These games were conceived by Markus Sittikus, a man with a keen sense of humour, as a series of practical jokes to be performed on guests.

KÖNIGSSEE

Königssee and it is emerald green water surrounded by a wonderful landscape is world famous. The cleanest lake in Germany is about 5 sq km, 8 km long, at its widest point, 1.2 km wide and up to 190 m deep. It was created in an already formed before the ice age valley, which was then deepened by powerful ice streams further.

ÖSTERREICHISCHE HAGELVERSICHERUNG

Österreichische Hagelversicherung WaG is a mutual insurance company, founded by the insurance industry in 1946. As specialist insurer with the most comprehensive range of products, we insure agricultural crops and vegetables against damage through hail and also against other risks e.g. frost, drought, flood, sprouting etc. With our products designed to make weather influence as well as deficiencies in cattle farming and horse keeping calculable, we provide comprehensive risk management to our farmers, which is getting more and more important, as the agricultural sector is affected directly by increasing weather extremes due to climate change.

We are the best
European agricultural
insurer for our clients
today and in the future.

LOCATION

Lerchengasse 3-5

Hagelversicherung

EUROPEAN LANDSCAPE CONTRACTORS ASSOCIATION

EUROPEAN LANDSCAPE CONTRACTORS ASSOCIATION

The ELCA is the European Landscape Contractors Association. To promote cooperation as well as the exchange of information and experience in Europe the European Landscape Contractors Association (ELCA) was founded in 1963. Twenty-one national landscaping associations are currently full members of the ELCA. Moreover the ELCA has five associated members.

The work our landscaping contractors do is very varied. Today their fields of activities are just not mainly landscaping work such as landscaping and maintaining gardens, private and public parks, but also of increasing importance for European landscaping contractors is the landscaping of leisure centres and sports grounds, greenery for roof gardens and facades, greenery for back yards, indoor gardens, creating

slow traffic areas, landscaping roads and accompanying paths etc. as well as the renaturalisation of stream beds.

The landscaping sector is an industry with a future in Europe. Most of the 74,000 medium sized landscaping businesses employ less than 50 staff per company. The industry as a whole employs more than 350,000 staff and the number is increasing.

European landscaping companies are proud of their large number of apprentice. On average the percentage of apprentices is eight percent of the employees. This demonstrates how many young Europeans regard the profession of landscape gardener as one with a future and how serious the companies take their responsibility towards vocational training.

- Look after the interests of landscape contractors Europe-wide

- Support the vocational training of young people and the mutual exchange of young qualified landscape gardeners

- Promote the mutual exchange of information and experience

- Promote cooperation with organizations with similar goals Europe-wide

Natürlicher Rasendünger, wirkt sofort und auf lange Zeit. Für gesunden, sattgrünen Rasen.

Oscorna-BodenAktivator
Aktiviert das Bodenleben. Denn gesunde Pflanzen brauchen gesunden Boden.

Oscorna-Animalin Gartendünger
Organischer Naturdünger für Nutz- und Ziergarten.

Oscorna®
Natürliche Dünger und Bodenverbesserer

www.oscorna.de

The brand “Oscorna” is more than 75 years old and it represents a natural fertilizer and natural plant care.

fiber and trace elements, plants prefer also a natural and varied nutrition. The organic fertilization meets the needs of the plants.

What is the secret of success?

Oscorna gives the nature - and that is the ultimate “customer” – exactly, what nature wants. All Oscorna products are based on 100% natural raw materials. This blend “with no side effects” in the natural cycle, revitalize the soil and promote healthy plant growth.

Plant strengthening

In the kitchen garden and by all ornamental plants we care through a healthy plant nutrition and soil for healthy plants, which are thus able to withstand an infestation of pests and diseases.

Oscorna stands for:

Healthy soil and natural plant nutrition.

The totality of this natural cycle, we see it as our task. And we also see this as a task for all of our partners in the field of trade and consumers. We all need to continue and much more, to place the customer (customer is ultimately the nature!) to the center of our activities.

Healthy soil

Oscorna products feed the soil life. This creates humus and soil structure and soil fertility will be improved. In a healthy soil will grow strong and healthy plants.

Healthy Plant Nutrition

Just as we people pay attention to a versatile food with sufficient vitamins,

Only a healthy soil can
grow healthy plants!

Give to the ground only
that the earthworm can
digest!

RICOTER Erdaufbereitung AG
